

Men's Comprehensive Health Screening

Our Comprehensive Health Screening is an in-depth review and analysis of your health, designed to examine and assess your wellbeing in detail. This package is generally recommended for adults with significant and past family history. The below information is a guide only and prices may increase or decrease as the doctor customizes tests required to your needs. Optional add on tests are not included in the package price.

The Comprehensive Health Screening will take approximately 60 minutes with the doctor.
