

Men's Essential Health Screening

Our Essential Health Screening is aimed at both men and women who are looking for a simple routine baseline screening. This package is generally aimed at younger adults with no significant medical history. The below information is a guide only and prices may increase or decrease as the doctor customizes tests required to your needs. Optional add on tests are not included in the package price.

The Essential Health Screening will take approximately 30 minutes with the doctor.

Consultation
