

Men's Vitality Health Screening

Our Vitality Health Screening takes the Essential Health Screening one step further to include the option of hormone screening and prostate screening. This package is generally aimed at slightly older adults with no significant medical history. The below information is a guide only and prices may increase or decrease as the doctor customizes tests required to your needs. Optional add on tests are not included in the package price.

The Vitality Health Screening will take approximately 45 minutes with the doctor.

Consultation
